

I have been informed of the FCC's potential decision to allow Low Power FM stations to take priority over current FM translators. I ask that you not allow this to happen. The ONLY station I currently listen to is an FM translator station, KLOVE on 106.7. This station is the only station in my community I have found that offers quality, family programming. It is very difficult to listen to other stations which air profanity and crude things and well as commercials which are totally inappropriate for younger listeners. I do not want my children listening to those kinds of things. I do not want to have to worry about commercials for products to "increase your sexual experience" being played at 5:00 in the afternoon while children are listening. I don't want to hear those kinds of commercials! KLove is a family friendly station. It plays uplifting, positive, encouraging music and it's on air personalities never use profanity or make off color, vulgar comments. They also provide accurate news and information on local events and family activities being held in the community. If this station is displaced, our community will be placed in the position of having no family friendly radio to listen to. I personally will have no radio station to listen to. I firmly believe our community desires family friendly programming. To allow this station to be taken over by a low power station will be detrimental to the community. I ask that you not allow this to happen.
